Creek Mouth Inset

Creek Description - Begin the approach to St. Patrick's Creek at the beginning of the channel. Stay in the middle of the channel as you head toward Red Marker #4 (you will see a Floating Green Bouy adjacent to Red #4 - Pictured in the Creek Mouth Inset). Move starboard hugging Red #4 as you pass the Green Floater. Once past the Green Floater move back to the middle of the channel until it ends. From this point stay in the middle of the creek until you see the Coltons Point Marina sign. The Fuel Dock has a maroon roof and has both Non-Ethanol Gasoline and Diesel. We are approximately 1 mile back from the mouth of the creek.
